

Mphasis F1 Foundation – TrackShift Innovation Challenge

AIRIA HACKATHON:

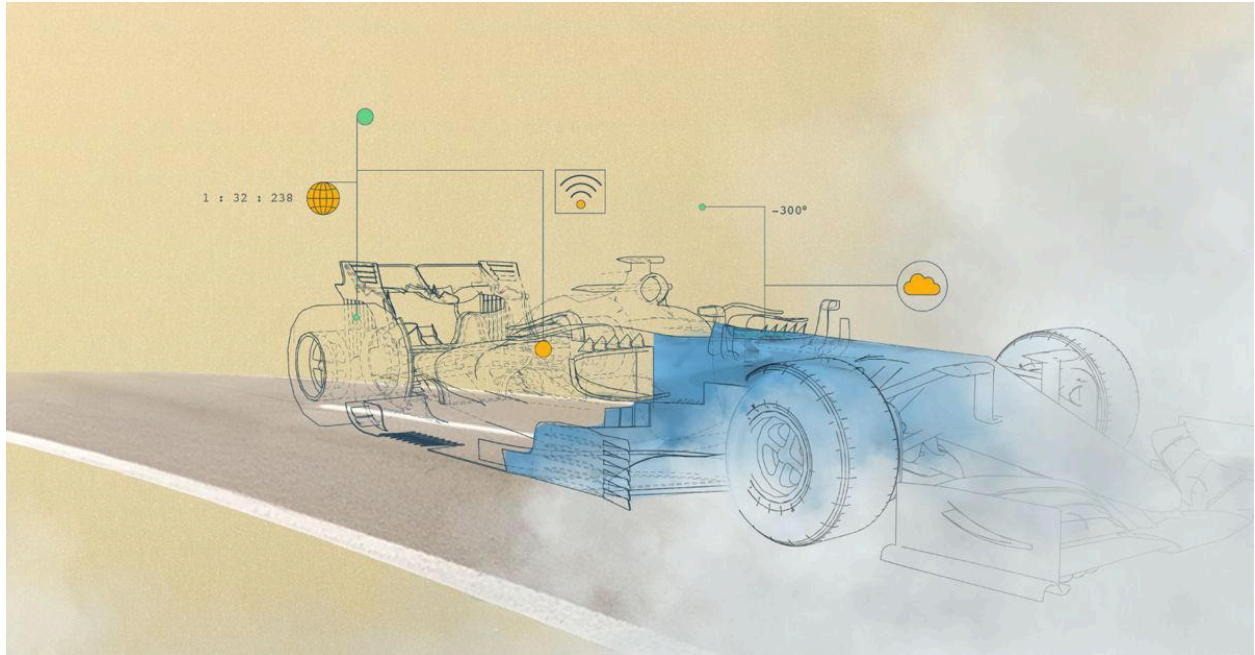

Race Beyond the Track

ATLASSIAN
Williams
F1 TEAM

 **airia**
OFFICIAL PARTNER

The **TrackShift Innovation Challenge** is a national-level innovation hackathon organized by the [Mphasis](#) F1 Foundation in partnership with [Plaksha University](#).

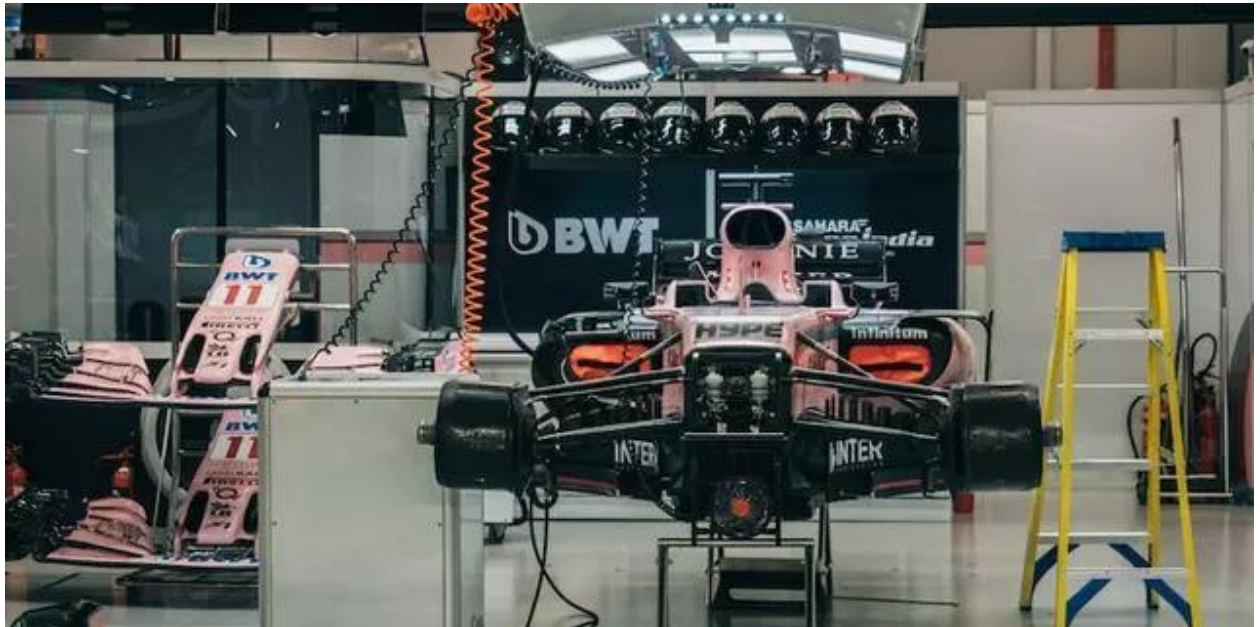

It focuses on:

- AI
- Data Science
- Simulation
- Mobility systems
- Embedded systems
- Smart technology solutions

Inspired by Formula 1 engineering and the MoneyGram Haas F1 Team. ([Mphasis](#))

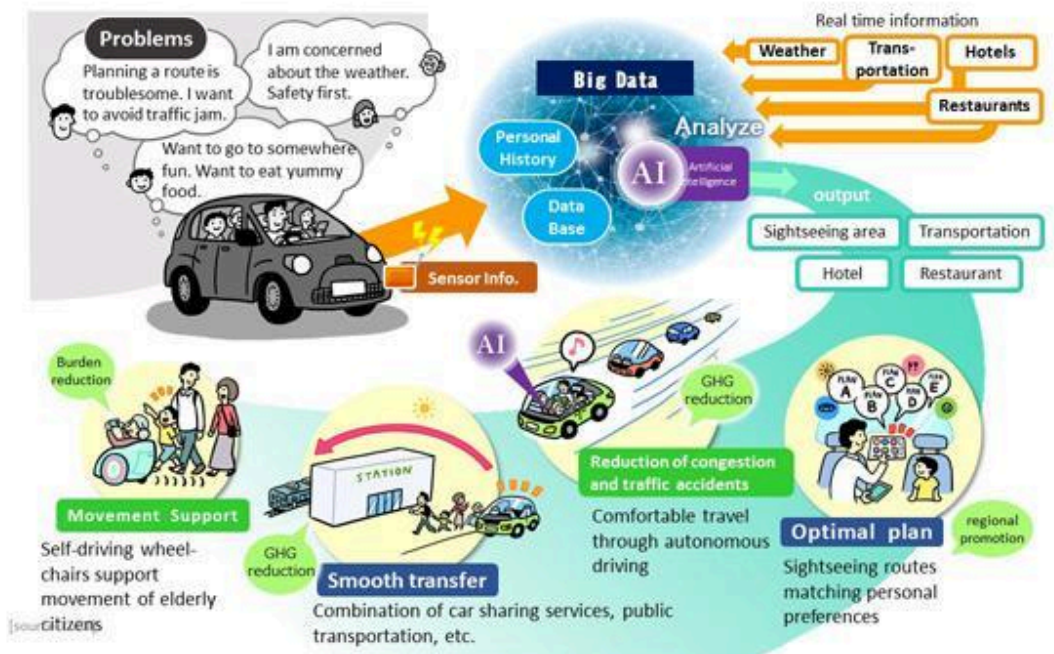

Main Themes

Problem Areas

- AI-based mobility systems
- Smart file transfer systems
- Real-time simulation
- Autonomous systems
- Wireless communication
- Computer vision

Some official challenge examples:

1. Visual Difference Engine
 2. Smart File Transfer System
 3. Competitive Mobility Simulator ([Mphasis](#))
-

Eligibility

Who Can Join?

- Undergraduate students across India
- Team size: 2–3 members
- Any branch/domain allowed

([Trackshift](#))

Rewards

Top Benefits

- UK trip to MoneyGram Haas F1 Team facility
- Internship opportunity at Mphasis
- Cash prizes
- Industry exposure
- Networking with engineers

Prize pool mentioned:

- ₹1,00,000 Winner
- ₹50,000 Runner-up
- ₹25,000 Second Runner-up

([Trackshift](#))

Technologies Useful for TrackShift

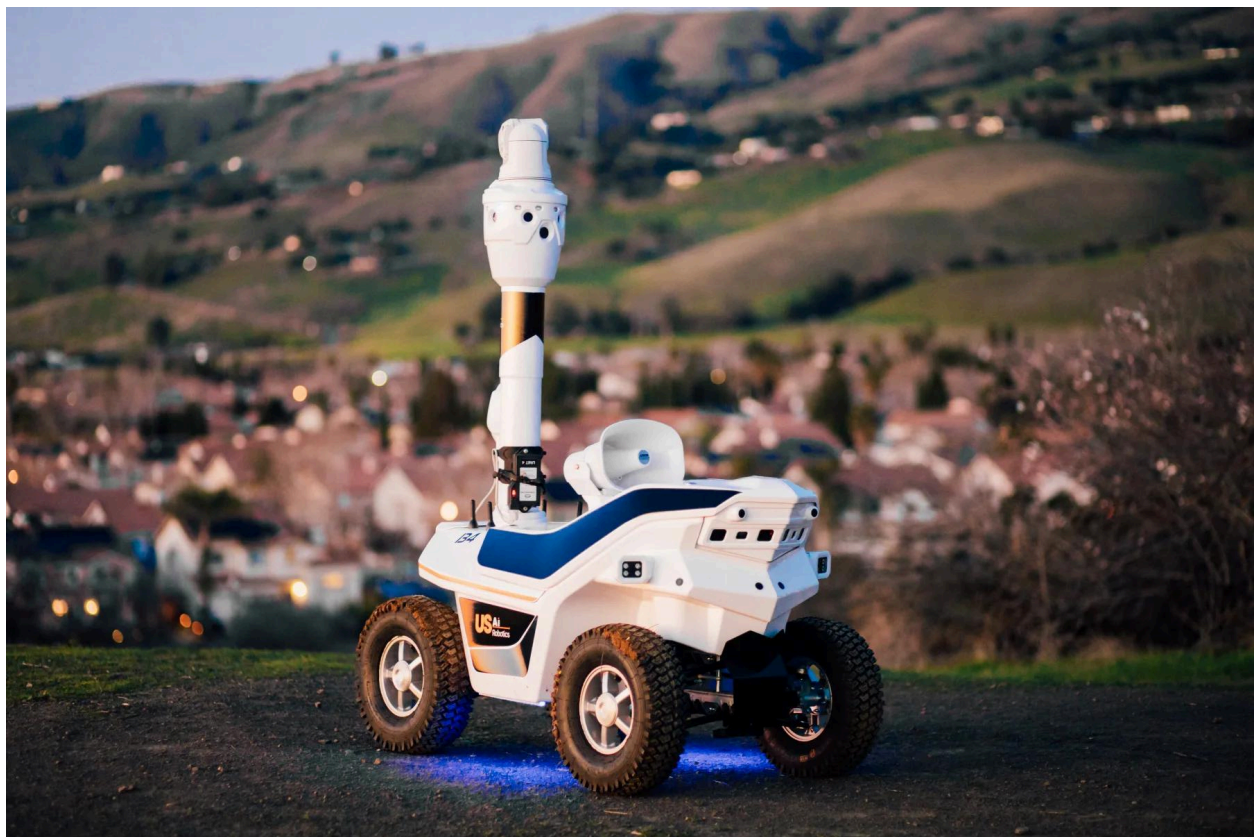

Based on your interests, these are highly valuable:

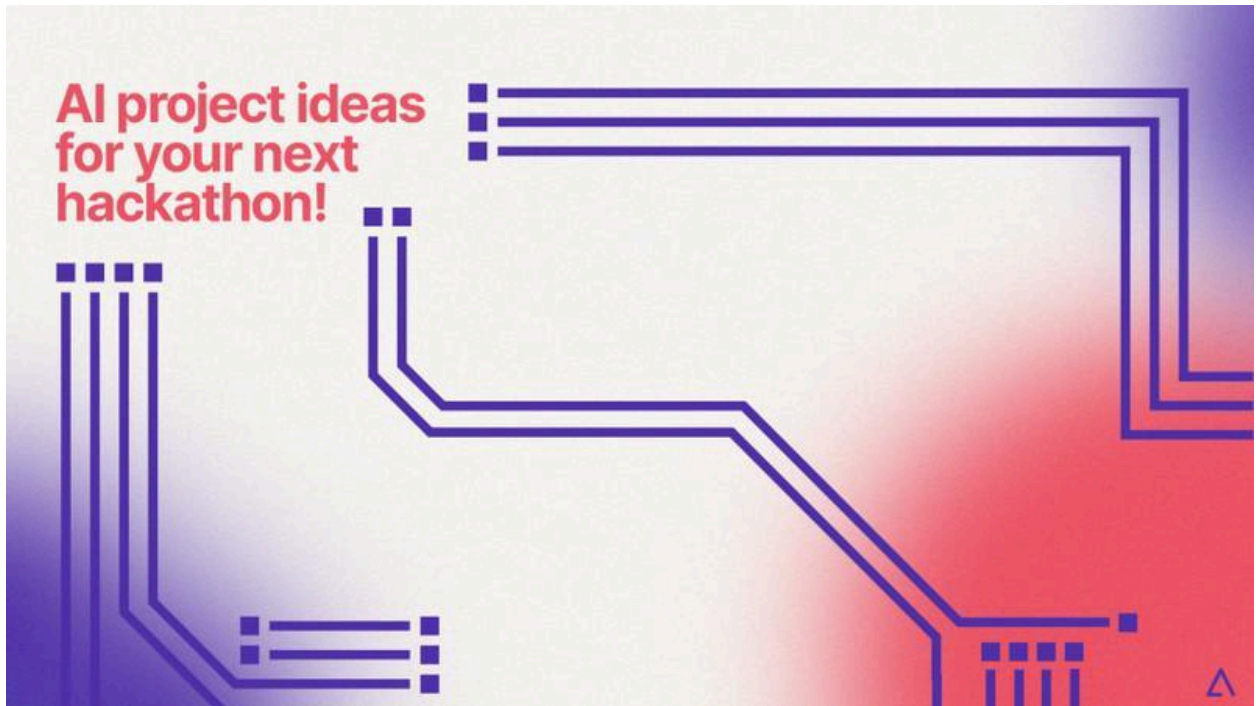

Domain	Technologies
Embedded	ESP32, STM32, Raspberry Pi
AI	OpenCV, YOLO, TensorFlow
Networking	LoRa, MQTT, Wi-Fi
Robotics	ROS, Autonomous navigation
Visualization	Dashboards, Simulation
IoT	Sensors + Cloud

Strong Project Ideas for TrackShift

Good Ideas

- AI Surveillance Rover
 - Thermal Human Detection System
 - LoRa-based Emergency Network
 - Smart Mobility Dashboard
 - Autonomous Delivery Robot
 - AI Traffic Monitoring
 - Drone Coordination System
 - Industrial Safety Monitoring
-

Best Stack for You

Since you are already exploring:

- ESP32
- LoRa
- Raspberry Pi
- Thermal Camera
- AI + Robotics

You are moving toward:

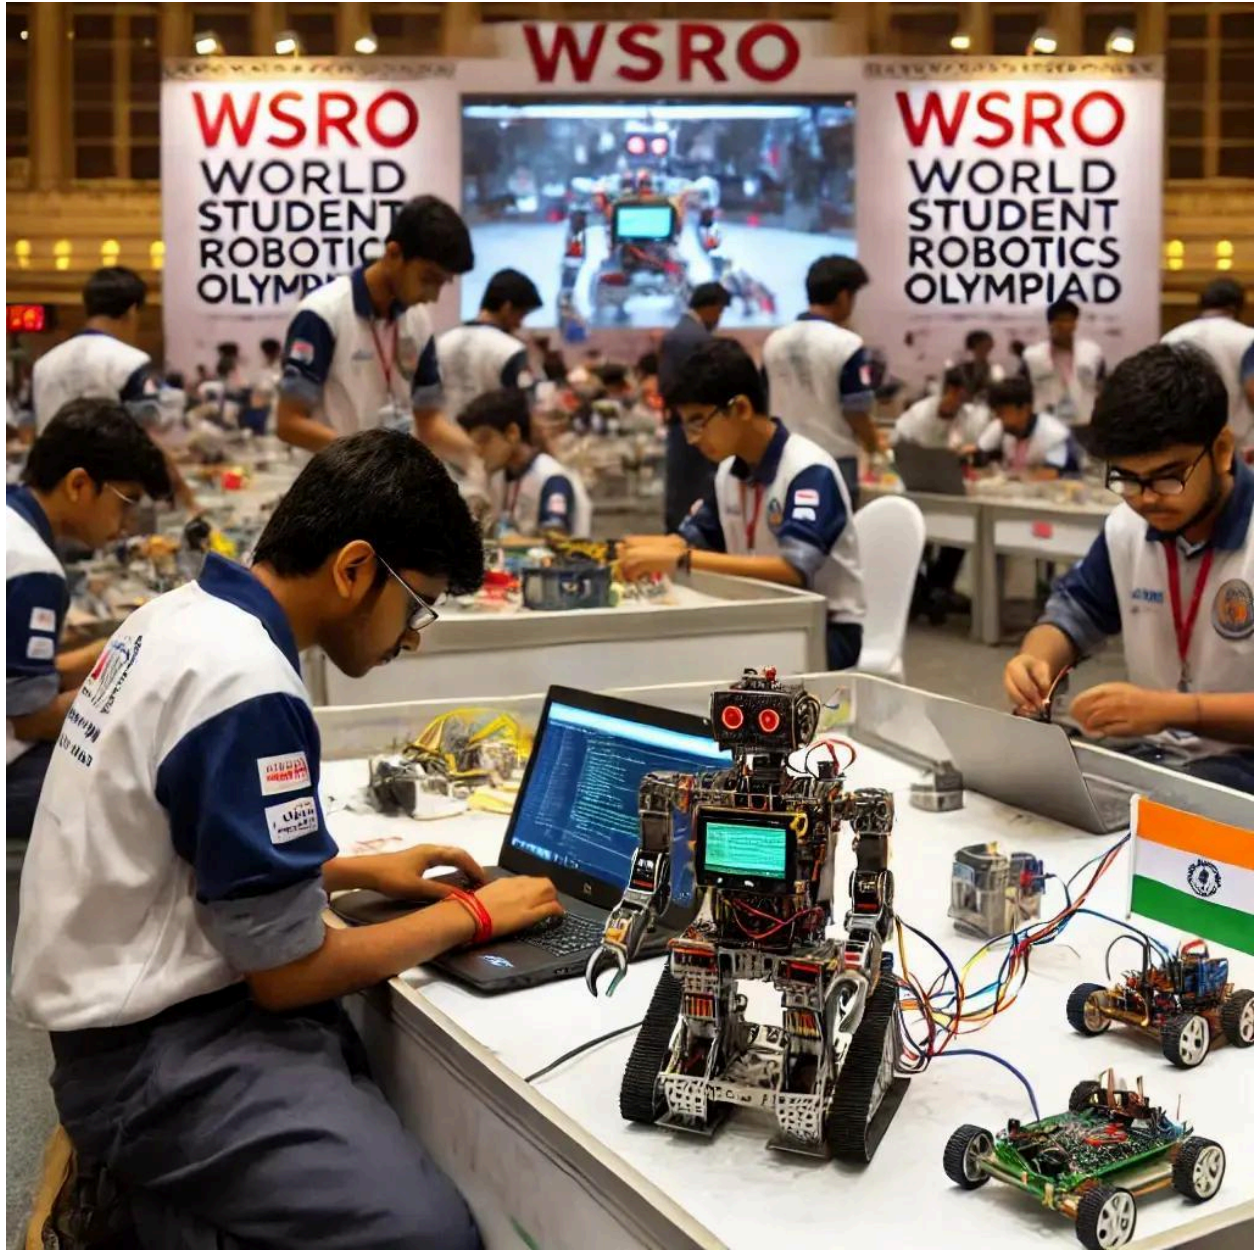

Embedded AI + Autonomous Systems

That matches TrackShift themes very well.

Skills That Increase Winning Chances

Important Skills

- Problem solving
 - Fast prototyping
 - Sensor integration
 - AI detection
 - Wireless communication
 - Dashboard visualization
 - Team presentation
-
